

# Key Facts 2022

## The Nordic Way

We have a saying, “One size fits one”. Meaning, at Nordic we work closely with all clients to create bespoke solutions that are discussed with an open mind, developed with creative thinking, and delivered with integrity but always with a conservative risk approach.

10 years of Nordic Marine Insurance has seen us become the market reference point for innovative fixed premium primary layer insurance solutions. This is because we have built Nordic through maintaining high-quality, long-term relationships, keeping product management efficient and focusing on fair underwriting for all clients and our belief that clients with strong records should be rewarded.

We provide niche, made to measure products combined with expert advice, and committed, reliable service. Our team has more than 100 years total combined experience of delay insurance and even more of marine mainstream insurance.

Sticking to these fundamentals for the benefit of our clients is at the centre of everything we do at Nordic.

## Nordic Strengths

Delay Insurance specialists

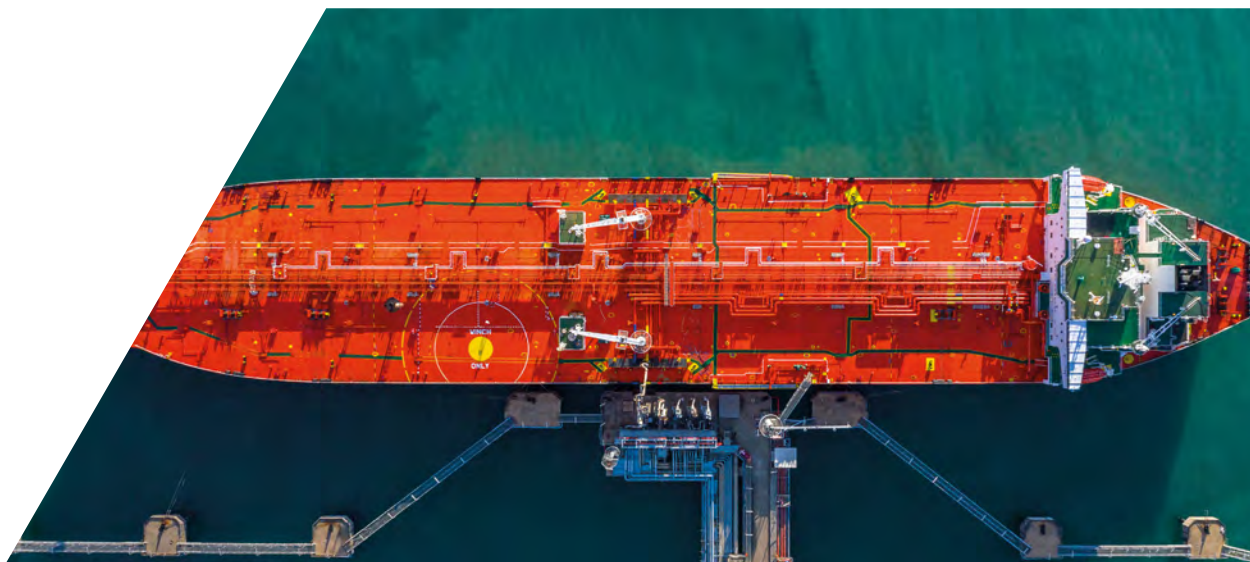

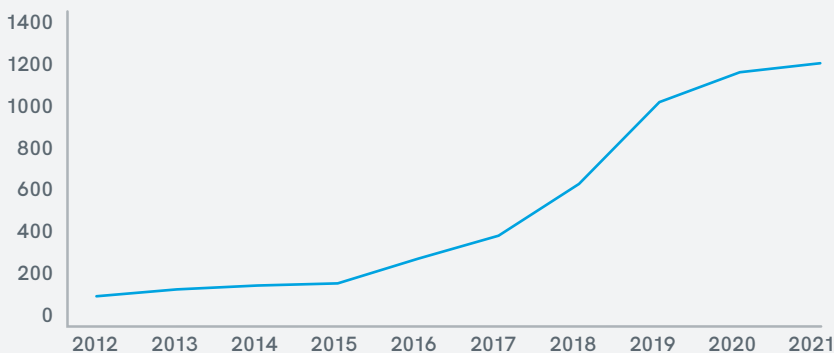

Controlled growth

Swedish FSA approved and Solvency II compliant

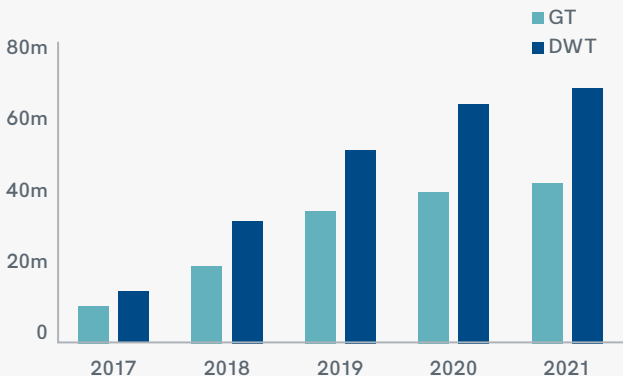

Established marine insurance partnerships with A-rated security
